PROFESSIONAL SUMMARY

Software Engineer at ComplianceCow with experience in GRC, compliance automation, and software development. I enjoy building practical solutions, solving real-world problems, and exploring new technologies. My areas of interest include Web Development and DevOps, and I am currently learning Rust and exploring backend and systems-level development.

PROFESSIONAL EXPERIENCE

Software Engineer – ComplianceCow (JUL 2026 – PRESENT) | *Chennai, Tamil Nadu*

- Develop compliance automation workflows and controls for GRC and security requirements using Python and automation frameworks.
- Build API integrations with platforms such as Salesforce and Okta to automate data collection, processing, and compliance checks.

Software Engineer Intern – ComplianceCow (JAN 2026 – JUN 2026) | *Chennai, Tamil Nadu*

- Created rules and workflows with the Control Automation Framework to streamline compliance and security controls.
- Built API integrations with AuditBoard, GitLab, ServiceNow Assets, and Wiz, along with custom Python tasks and MCP-based rules

IT Networking and Cybersecurity Intern – Zero Tech Cyber, Hyderabad (JUL 2024 – JUL 2024)

- Managed network configuration, monitoring, and system documentation.

EDUCATION

B.E. Computer Science and Engineering (2022 – 2026)

- K.S.R. College of Engineering, Namakkal || CGPA: 7.74

TECHNICAL SKILLS

Programming Languages: Java, Python, Go

Frontend: React.js, [Next.js](#), Svelte, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Database & Storage: MongoDB, PostgreSQL, Supabase, Pinecone, MinIO

DevOps & Tools: Docker, Git, GitHub

PROJECTS

DeepPhotos – Self-Hosted Photo Management

- Architected a lightweight, self-hosted photo and file management platform utilizing Svelte, Go, SQLite, MinIO, Docker, and Tailwind CSS.
- Engineered robust features including intuitive photo organization, customizable albums, password-protected vaults, document categorization, and user access management.
- Containerized the entire application stack using Docker to facilitate seamless self-hosting and zero-dependency deployments across environments.

Face Finder — Real-Time Face Detection & Matching

- Developed a real-time facial recognition and detection application combining a React.js frontend with a high-performance FastAPI backend.
- Integrated DeepFace and FaceNet embeddings to achieve high accuracy in facial verification and feature matching across varied lighting and orientations.
- Deployed frontend assets to Vercel and backend services to DigitalOcean instances, configuring production build setups and CORS middleware.

Needle and Knot – E-commerce Website

- Designed and built a full-stack, fully responsive e-commerce web platform leveraging React.js, Tailwind CSS, and Supabase database/auth services.
- Implemented end-to-end shopping workflow features including real-time product filtering, promotional offer codes, dynamic cart management, and checkout flows.
- Utilized Supabase Row Level Security (RLS) to enforce data governance and protect customer profile and transaction privacy.
